PROFESSIONAL SUMMARY

Information Systems student and Backend AI Engineer with proven experience designing high-throughput asynchronous APIs, scalable event-driven background queues, and autonomous LLM repair loops. Skilled in building production-ready architectures with Java (Spring Boot), Python (FastAPI), PostgreSQL, Docker, and Anthropic Claude APIs. Strong background in microservices, OCR document processing pipelines, automated testing, and CI/CD.

TECHNICAL SKILLS

Backend & APIs:	Java, Spring Boot, Python, FastAPI, RESTful APIs, Microservices, Spring Security, JWT, Celery.
Databases & Cloud:	PostgreSQL, Redis, Supabase, Docker, SQL, AWS (EC2/S3 basics).
AI & LLM Systems:	Anthropic Claude API, Model Context Protocol (MCP), Autonomous SRE Agents, Prompt Engineering, OCR.
Tools & Testing:	Git, GitHub Actions, CI/CD, JUnit, Mockito, Pytest, Swagger/OpenAPI, Linux/Bash, Clean Code, SOLID.
Languages:	Portuguese (Native), English (C1 Advanced — Technical Interpreter).

PROFESSIONAL EXPERIENCE

Backend AI Engineering Intern July 2026 – Present

FlyRank AI Internship • Remote / Sarajevo

- Architected the 10x Task Manager Platform & Autonomous SRE Agent achieving sub-50ms API response times.
- Implemented asynchronous background worker queues with Celery for PDF report generation and auto-tagging.
- Engineered an autonomous self-healing SRE loop using Claude Code to intercept exceptions and auto-repair services with a 100% test resolution pass rate.

Software Development Intern June 2025 – June 2026

Midas Systems Development • Remote

- Developed an intelligent conversational chatbot using Spring Boot and Flutter/Dart, boosting user interaction by 20%.
- Integrated LLM document processing pipeline via OCR, increasing document data extraction accuracy by 15%.
- Implemented comprehensive unit and integration testing suites with JUnit and Mockito, reducing defect rate by 30%.

English Interpreter January 2024 – December 2024

FIRA RoboWorld Cup 2024

- Provided real-time technical interpretation in high-pressure robotics competition environments, enabling seamless international team communication.

KEY PROJECTS

Task Manager API & Autonomous SRE Agent Open Source / FlyRank 10x Solution

Python, FastAPI, PostgreSQL, Supabase JWT, Celery, React Flow, Claude Code

- Engineered asynchronous RESTful task pipeline with interactive DAG visual execution and automated SRE triage.
- Published full test coverage (pytest) and comprehensive OpenAPI documentation on GitHub.

SIGAMA Vision — AI Agricultural Compliance Platform AGED / FAPEMA Grant

React 18, TypeScript, Tailwind CSS, Python OCR, LLMs

- Built document analysis workflow for agricultural transportation guides (GTAs) with automated fraud detection and compliance scoring.

LLMX & DistroWiki Open Source Projects

TypeScript, Node.js, React Ink, React, Vite, Tailwind CSS

- Developed LLMX (terminal AI assistant for Linux with natural language command execution) and DistroWiki (Linux distribution benchmarking platform).

EDUCATION & CERTIFICATIONS

B.S. in Information Systems March 2024 – March 2028
Federal Institute of Maranhão (IFMA)

Certifications: Anthropic Academy (20 Certified Credentials in Claude Architecture & Agent Skills), DIO Spring Boot & Java API Development Specialist (14 Certifications), AWS Cloud Computing Fundamentals.
